ABSTRACT

This monograph contains follow-up information gathered by 54 Texas postsecondary institutions on 1975-76 occupational/technical graduates of both certificate and associate degree programs. Data are reported for 8,763 graduates from a total population of 13,958. The highlights were that: (1) 71% of the graduates were full-time employees in their field of training or a related field; (2) 53% were male; (3) ethnic distributions were 66% white, 15% Hispanic, 9% black, 1% American Indian, and 9% undefined; (4) while all areas reported employment percentages above 65%, health occupations, technical education, and homemaking were highest with 88%, 84%, and 80% respectively; (5) graduates who were continuing their education at higher levels ranged from 4% to 14% in specific program areas; and (6) unemployment rates ranged from 2-12% according to program areas. Data are presented on the employment status, ethnicity, sex, and continued academic enrollment of graduates of each of 173 program areas. A copy of the questionnaire used most often by the colleges is included. (RT)

This monograph is documented by the staff of the Tex-SIS Follow-up System. The Tex-SIS Follow-up System is supported by funds from the Department of Occupational Education and Technology, Texas Education Agency, Austin, Texas 78701.

August 1977

COMPLIANCE WITH TITLE VI, CIVIL RIGHTS ACT OF 1964; TITLE IX OF THE EDUCATION AMENDMENTS OF 1972; AND THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964; Title IX of the Education Amendments of 1972; and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

(1) acceptance policies on student transfers from other school districts;

(2) operation of school bus routes or runs on a non-segregated basis;

(3) non-discrimination in extracurricular activities and the use of school facilities;

(4) non-discriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;

(5) enrollment and assignment of students without discrimination on the basis of race, color, national origin, or sex;

(6) non-discriminatory practices relating to the use of a student's first language; and

(7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act and/or Title IX of the Education Amendments of 1972 is found, the findings are reported to the Office for Civil Rights, Department of Health, Education and Welfare.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

Preface

This monograph is part of a series of publications designed to disseminate data produced by the Tex-SIS Follow-up system. The system, designed by Tarrant County Junior College, Fort Worth, Texas, is currently in use on a statewide basis among the various postsecondary institutions in Texas. A total of fourteen different questionnaires are available for utilization by the colleges on a discretionary basis. These questionnaires, in addition to system implementation procedures, are contained within follow-up Manuals, which are being used by the colleges to conduct their surveys. These Manuals were distributed statewide in August of 1976.

The data in this monograph represents information gathered by Texas postsecondary institutions in partial fulfillment of their State occupational/technical reporting requirement. The population included is occupational/technical graduates of both Certificate and Associate Degree programs offered in the involved Texas colleges. Response rates were reported on fifty-four reporting units as displayed on a graph in another section of this document. An average statewide response rate of 63% was achieved by these 54 reporting units, while reporting data on 13,958 students. Approximately 8,763 of the 13,958 students were actually followed-up.

The most common technique utilized by the colleges was the mail survey; in most cases, three mailouts were conducted with the first mailout consisting of a transmittal letter, questionnaire, and postage-paid return envelope, while the second mailout consisted of a postcard reminder only. The third mailout, in many cases, was a repeat of the technique utilized in the first mailout.

A copy of the questionnaire used most often by the colleges is included in another section of this report. In many cases, both occupational/technical and university transfer students were surveyed utilizing the same questionnaire. After the questionnaire was returned, the colleges were asked to code the appropriate information on individual op scan forms. A sample copy of the op scan form utilized is included in another section of this document. The completion of all blocks on the op scan form was requested on each occupational/technical graduate and other completers, with the exception of blocks 11, 12, and 13 not being completed when a student response could not be achieved.
